

2 Way Rotational Endoscope ---- 88DR

88DR model Can revolve probe 180° to R or L direction, then revolve F to fix adjusted angle

Articulation Endoscope Specification with rotatable probe is innovative product of LCD borescope. Besides many advanced functions of its original one such as quick snap, quick video recording, image zoom in /out, storage a new function of front probe two-direction bending is added(you can revolve probe 180° to R or L direction, then revolve F to fix adjusted angle)The probe itself also allows a 120°revolving across its two directions. The design allows the user to adjust the observation angle amid the observed object making operation more easy and more convenient. The product has great practical value and applicable prospect in many fields such as automobile cylinder detecting and casting process detecting.

Display: 3.5" TFT LCD Monitor Powered by DC5V

Interface: Mini USB 1.1/AV out

Battery(not user serviceable): Rechargeable Li-Polymer Battery (3.7V)

Power adapter: 100-200 V AC in/5.5 V DC out

Video Out Format: NTSC & PAL

Recording capacity :16 GB with TF card

Compression Format: MPEG4

Still Image Storage Format: JPEG(640*480)

Video Recording Format: ASF(320*480)

Working & Storage/Battery charging temperature range: -20°C to 60°C/0-40°C

Features:

- 1.Allows for easy surveying of narrow, hard-to-reach places
- 2.Two way rotational tube with 5.5mm water-proof camera (640x480 pixels len)with 1 meter(3 ft) flexible and removable extended tube
- 3.Manufactured and tested to water-proof level IP67
- 4.Increase visibility with 6X digital zoom capacity
- 5.High quality 3.5"TFT-LCD monitor powered with built-in rechargeable Li-batteries

- 6.Video,pictures real-time recording capability,supports up to 16GB SD Card
- 7.Adjustable brightness on lens-mounted LED lights
- 8.Three useful optional accessories included:hook,mirror and magnet twisted on the len
- 9.Simple menu with eight different languages(optional)
- 10.Light weight,handheld design,flexible and convenient to use

User could buy as an additional part or make replacement for damaged parts

- 1.Flexible rotational tube with 1M,2M,3M length for easy use
- 2.Professional Carry Case Package
- 3.Flexible tube,Main unit,AV Cable,USB Cable,Hook,Mirror,Magnet,SD Card

Advantages:

No MOQ for standard items

Customer colors, label and logo design

Stable, high quality products

Fast lead time

Professional service

Technical support

Partnership support with marketing and product integration, OEM/ODMs

The Portable LCD Video borescope inspection camera has many applications including:

Engines Inspection

Boiler Inspection

Aviation Maintenance

Power Plants

Wind Turbines

Water Treatment Plants

Equipment Maintenance

HVAC

Plumbing

Manufacturing

Building Inspection

Standard Delivery:

- | | |
|-------------------------|---------------------------|
| 1 x AC/DC Adapter, | 1 x SD Card |
| 1 x A/V Cable, | 1 x USB Cable |
| 1 x Instruction Manual, | Standard Tool Box Package |
